Dear Georges,

We kindly request you to approve the attached slides for presenting the approved paper at the LangSec workshop on May 25th (<http://spw17.langsec.org/index.html>). We require your approval before Labs management give their approval.

The previously approved paper is in Archivist (<http://ol-archivist.us.oracle.com/archivist/document/2017-00168>). The slides do not discuss any form of vulnerabilities in the JDK. In Slide-4 and Slide-20, some code fragments from OpenJDK classes are used as examples.

Best Regards

Yi
